

IN THE SPECIFICATION:

Please replace the paragraph at page 4, lines 1-3, with the following:

Where the Transition Metal Complex is drawn from the group of transition metal-ligand complexes known to promote the Pauson-Khand reaction and is preferably a cobalt carbonyl or **cobalt** ~~coablat~~ complex derivative thereof.

Please replace the paragraph at page 7, lines 12-14, with the following:

A further feature is the use of a resolved or partially **resolved** cobaltcarbonyl complex containing a chiral centre within the ligand linking the cobalt to the immobilised support, in a Pauson-Khand reaction to give a product that is, preferably, resolved or partially resolved.
